## *Do you have the sun on your desk?*

Imagine you have the sun on your desk. You can entirely control the intensity and color temperature of sunlight. Now, you have the miniature of the sun on your desk by Feelux's technology.

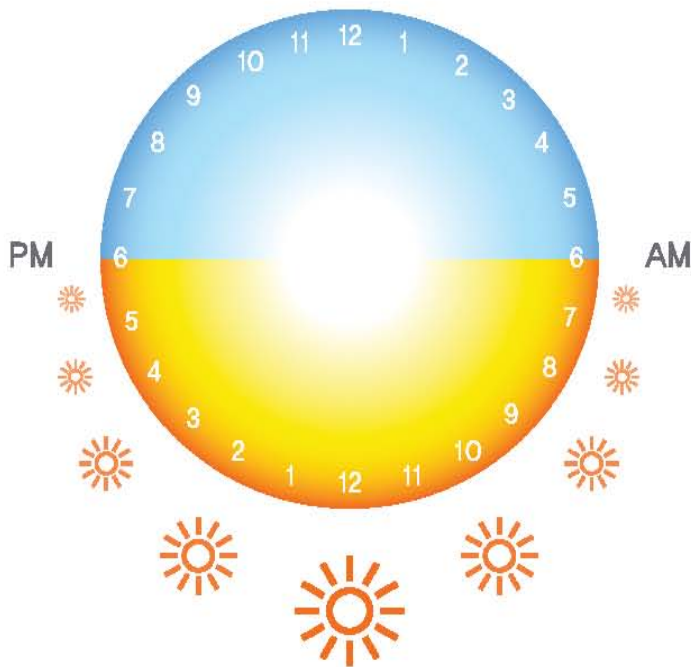

Novaluce is equipped with a patented lighting system which simulates seasons changing and even various time of a day: sunrise, midday and sunset.

It brings many benefits of sunlight into your home or office, helping to improve your visual acuity so you can read small details with greater ease, increase your concentration with less eyestrain and comfort yourself during a break.

It is especially designed for computer workstation and ideal for anyone who has to spend lots of time reading or writing at

a desk.

Its luxurious and futuristic design not only looks good but also creates a professional or academic atmosphere around your desk. Differentiating from normal desk lamps, Novaluce is also suitable for appreciating a work of art or coffee break with its resting mode function.

Novaluce performs various day lights based on Feelite system of Feelux.  
For further information of Feelite system, see (About us) section of this catalog.
