

Auto CPAP titration test

sleep-tight.co.uk

- Find out optimal pressure from auto CPAP data which is stored at machine for 1 week
- All data is reviewed by highly skilled sleep technologist
- Re- adjust pressure if the user wasn't satisfied at the pressure

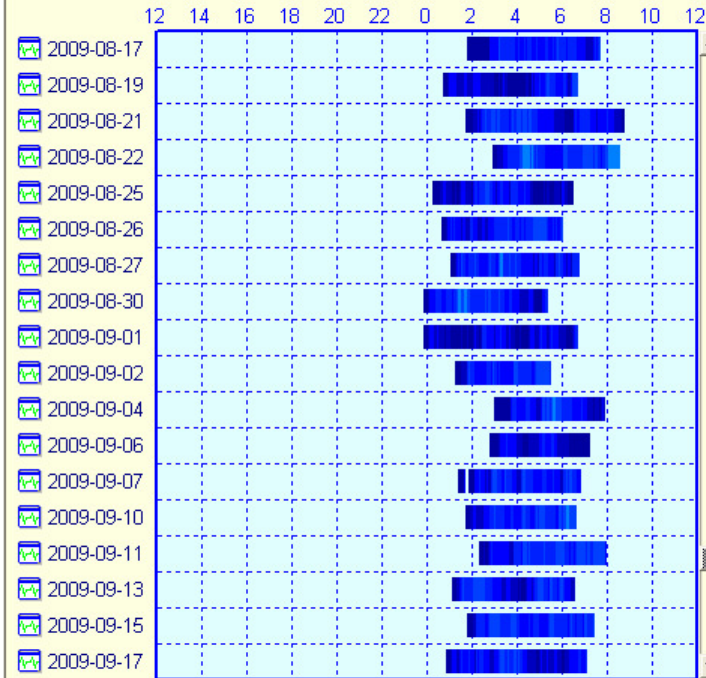

Recognize respiratory disturbance and snoring by air flow signal at pressure 9.5

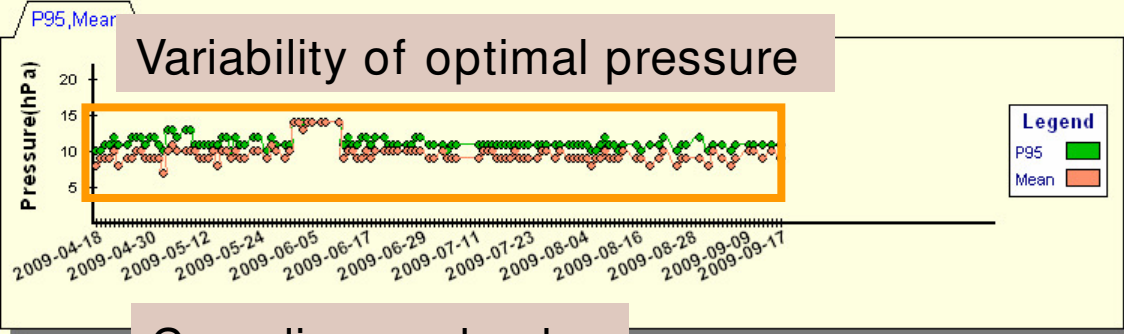

Recognize sleep apnea and snoring by air flow signal at pressure 9.5

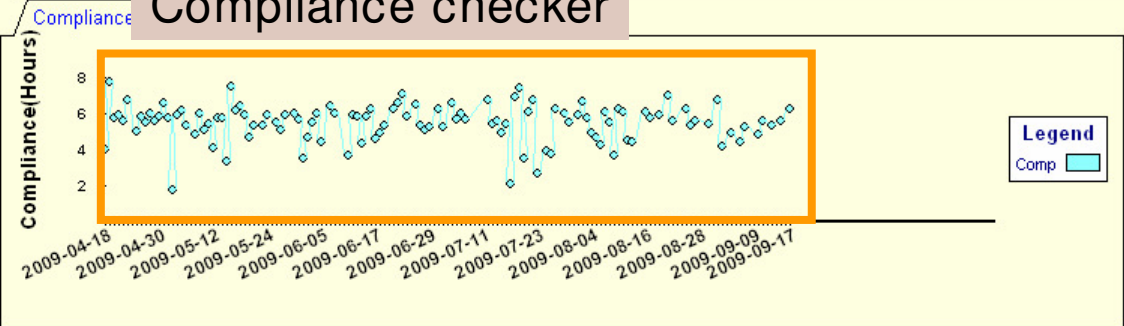

Recognize flow limitation without snoring by air flow signal at pressure 8.5

Variability of optimal pressure

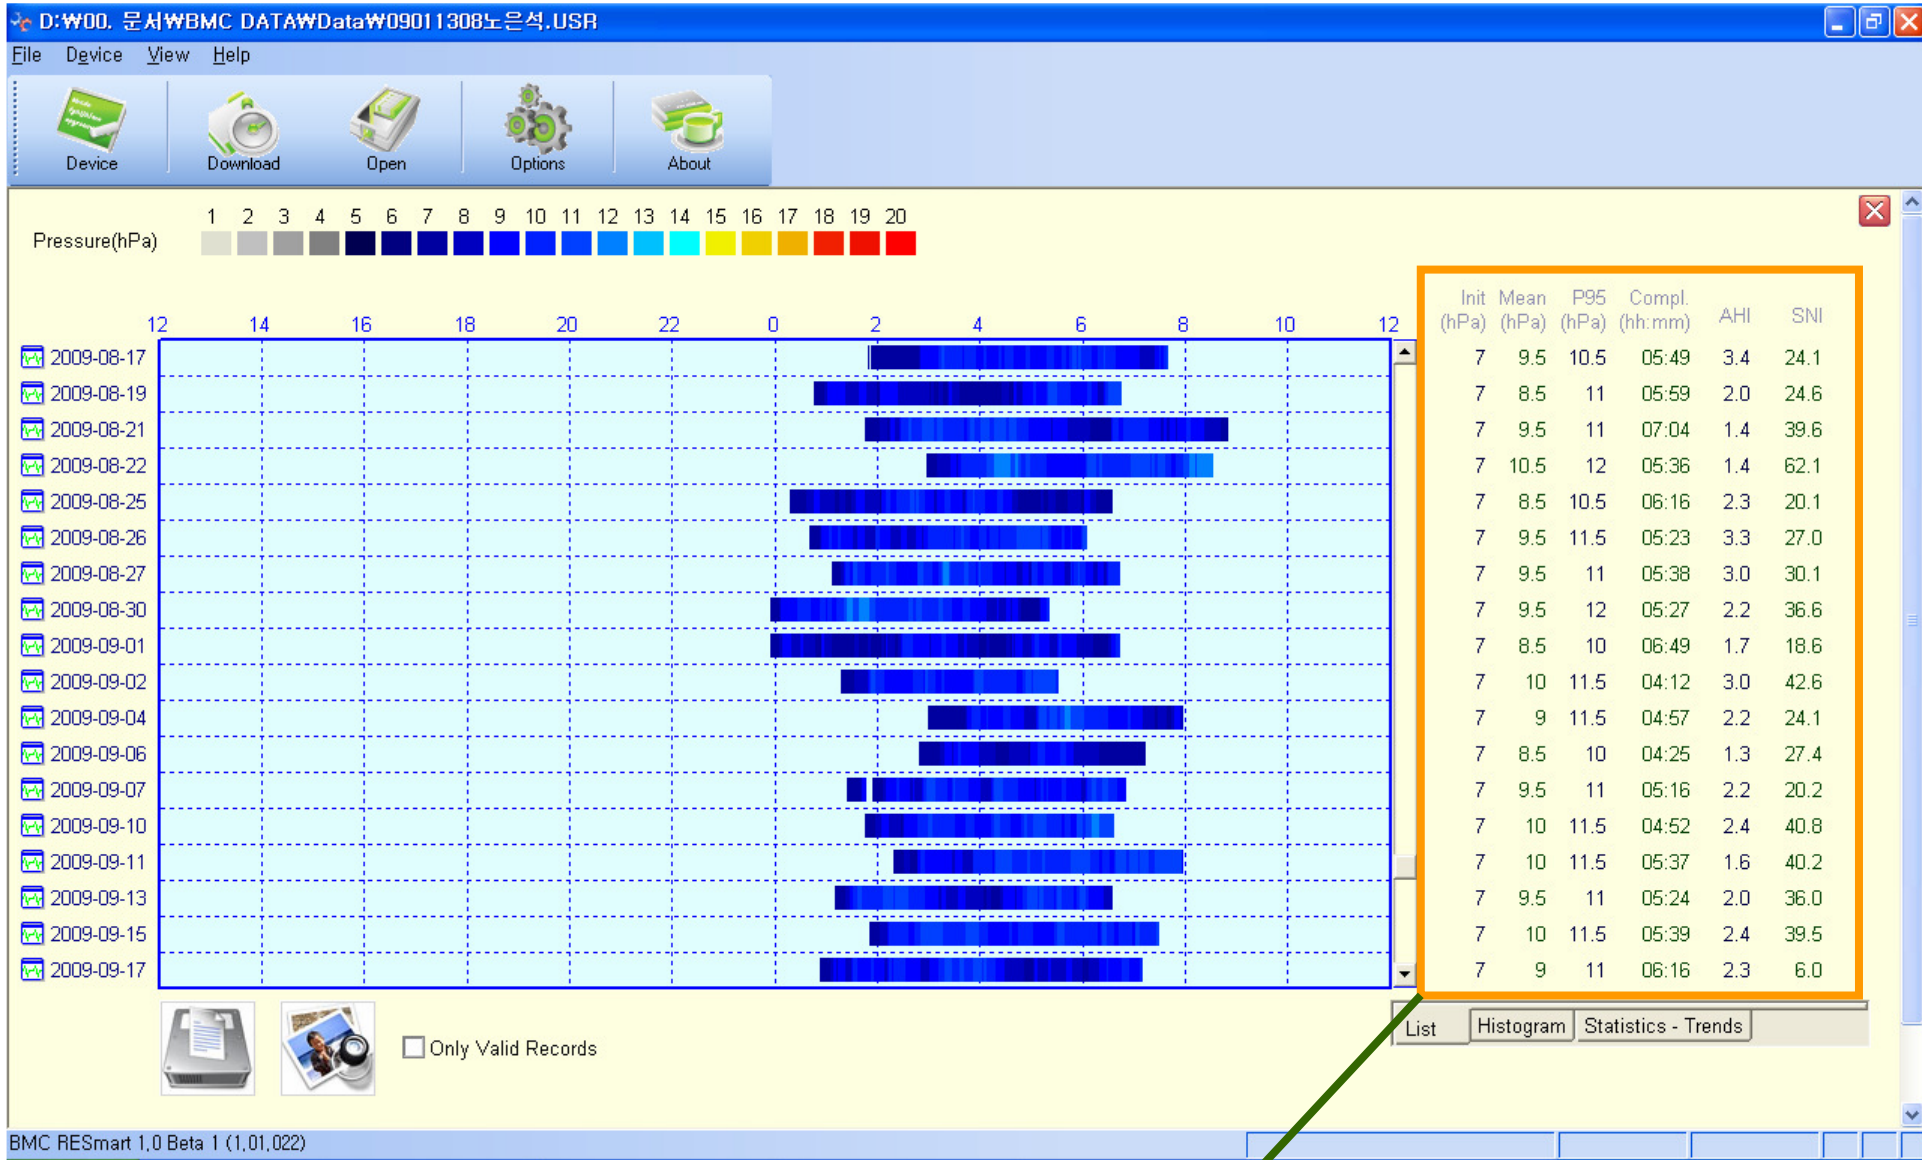

Compliance checker

Only Valid Records
