Quality makes the Difference ■■■

**AUTOFLEX**

Flexibly adapted

- Separately adjustable inspiratory pressure support and pressure reduction for maximum expiratory therapy flexibility.
- 3-stages FLEX-Level for inspiration and expiration can separately be switched on and off.
- Comfortable and natural feeling of breathing through optimal pressure supply
- Significant therapy acceptance increase

The second generation of the well-established Hoffrichter therapy comfort mode FLEXLINE has been integrated into the APAP algorithm now. The result is a more flexible treatment for highly satisfied patients.
