

# PAD A CHEEK<sup>®</sup>

## Mask Liner Wisp

- Remove the seal from the mask
- Place the seal into the mask liner (Photo #2 & #3). The wide part of the mask cushion should be against the label.
- Pull the flap over the hole of the seal, pulling it over the edge of the flange. It will stretch.
- Repeat this for the other flap (Photo #5).
- Snap the headgear over the hole and the flaps of the mask liner (Photo #6).

**Make certain no exhalation vents are covered** with the **PAD A CHEEK- Wisp Mask Liner**.

Note: You may need to cut the hole larger to accommodate your nose, do this with sharp scissors a little bit at a time. **It is very easy to get the hole too large.**
