AirTouch™ F20

Our softest
mask ever

Featuring ResMed's UltraSoft™ memory foam, the AirTouch F20 cushion delivers a significantly softer mask experience than silicone.

[ResMed.com/AirTouchF20](https://www.ResMed.com/AirTouchF20)

Superior comfort and uncompromising seal

Foam has unique properties that provide **less friction and contact pressure** than a standard silicone cushion – even when it's sealed firmly against your face. This reduces the likelihood of red facial marks.¹

And because foam is permeable, a very small amount of air can pass through your cushion, delivering a more natural sleeping experience without compromising your therapy treatment.

Reduced likelihood
of red facial marks

Easy to care for

Thanks to its replaceable cushion, the AirTouch F20 allows for a simpler, **smoother cleaning process**.

A simple wipe down every morning is all that's needed to enjoy a fresh therapy experience every night!

Clean with alcohol-free
wipes only

Replace regularly
to feel clean daily

Freedom of choice

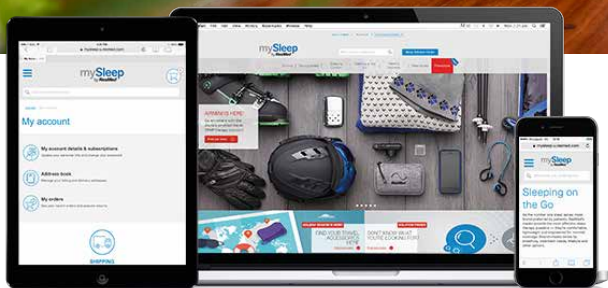

AirTouch F20 is made with **interchangeable components** so you can easily mix and match them with AirFit™ F20 mask.

A wider set of options makes it easier to find a solution that maximises comfort, therapy compliance and success.

AirTouch F20 cushions are also compatible with AirFit F20 for Her masks, so female patients can enjoy the comfort of Ultra-Soft foam alongside the outstanding fit of a female-specific mask.

Compatible with AirFit F20 masks,
including AirFit F20 for Her

Buy online
